

# Tradex Marina Salt

Premium sea salt solution for winter maintenance applications with high sodium chloride content and controlled granulometry.

## TECHNICAL CHARACTERISTICS

| Chemical Characteristics |              |
|--------------------------|--------------|
| Parameter                | Infosa Value |
| Sodium Chloride (NaCl)   | > 98%        |
| Insoluble residues       | ≤ 2%         |
| Humidity                 | ≤ 4%         |
| Sulfates                 | < 3%         |

| Physical Characteristics - Granulometry |                     |         |
|-----------------------------------------|---------------------|---------|
| Grain Size                              |                     | Value   |
| Millimeters                             | USS MESH            |         |
| 0.2 mm < x < 5 mm                       | Tamiz - USS 70 Mesh | 85-95 % |
| > 5mm                                   | Tamiz - USS 4 Mesh  | < 15%   |

| Additives                                                                               |
|-----------------------------------------------------------------------------------------|
| Antiapelmazante (E-535/YPS): 3-200ppm                                                   |
| CAS No. : 14434-22-1                                                                    |
| De-icing salt contains sodium ferrocyanide which is added to improve caking resistance. |
